All code and projects can be found at: ethan-pryce.github.io

Skills

- React
- Python

- Javascript
- MySQL

- MERN Stack
- API use

Projects (full breakdown at ethan-pryce.github.io)

Schedulebot.net - schedulebot.net/
A React website that uses the MERN stack to help the user find the best time to host events. Involves Google Identity services as user accounts and pseudo-concurrent behavior.

Cocktail Concluder - cocktailconcluder.ca/
A React webapp that uses the TheCocktailDB API to calculate how good adding an ingredient to your bar is.

Work Experience

Save-On-Foods, Delta BC
Grocery Clerk, July 2021 - Present
- Processed transactions with a high degree of accuracy and speed while giving personalized and thoughtful service creating a high quality experience.
- Provided quality assistance to both customers and team members leading to a higher quality of customer service and decreasing both issues and wait times throughout the front end.
- Identified and solved problems throughout the store to maintain quality which lead to a noticeable reduction in supervisor workload and customer issues.

Education

Langara College, Associate of Computer Science   Estimated Graduation June 2023
